☐ Other: _____

DISCUSSION: EPA conducted a file audit concerning the Reservco and Tellepsen property in Houston, Texas. Reservco was identified through an aerial photography search. A preliminary assessment (PA) was completed for the site in April 1992. During the PA, the site was identified as having two property owners Reservco and Tellepsen Corporation. The PA identified that Tellepsen portion of the site did not include any waste sources other than waste oil storage. All of the poor waste management activities are associated only with the Reservco property.

As a result of this desk audit, The Site Assessment Section recommends that the Tellespen property be separated from the Reservco site evaluation. Also, We recommend that the Tellepsen Corporation's property receive a No Further Remedial Action Planned under Superfund (NFRAP) decision. However, we still recommend additional site assessment activities continue for the Reservco property.

A copy of the Reservco PA report is attached to this Desk Audit to complete the Tellespen file.
